

Do you think your teen has a substance use problem?

Warning signs

- Mood changes such as increased irritability, verbally abusive or even violent with you or other children in the household
- Personality changes such as poor morale, low productivity, or lack of self-control
- Use of incense, room deodorizer or excessive perfumes and cologne
- Decline in academic performance
- Excessive use of mints, mouth washes and gum
- New friends and people whom the teen is unwilling to introduce to you
