

Hillsboro Outpatient Medication for Substance Use

Do you want to take meds to help you stop using drugs, or reduce your use? Come talk with us! We offer medications for substance use such as buprenorphine (also known as Suboxone or Subutex) and naltrexone. We can find a medication that can help you feel better, reduce cravings and reduce withdrawal.

Benefits of Medications for Substance Use

Meds for substance use really do make a difference! Most reduce cravings and many medications help you feel like your regular self. These medications can also reduce the risk of overdose, reduce substance use, and help you stay connected to treatment.

Get Started

Contact us to talk about options. We offer meds, counseling, groups and peer support in English and Spanish. We can find the combination that best works for you and supports your personal recovery journey.

Eligibility

The program is only available in Hillsboro at this time. We'll be expanding to Fora East, near Mall 205, soon!

Insurance

We take most insurance plans – every once in a while insurance won't cover specific meds, and we'll do all we can to get them covered.

Make an Appointment

You can make an appointment with a medical provider and/or intake assessment by talking to the program coordinator Emily Johnson, (503) 713-9155.

Explore your options for using medications to treat your addiction:

Buprenorphine (Most common brand names Suboxone and Subutex) for opioid use disorder.

Naltrexone pills for opioid and alcohol use disorder

Injectable form of naltrexone, called Vivitrol, may be available: talk with the coordinator.

Acamprosate (Campral) for alcohol use disorder
